

Penetration Half Urethane Headform as per ISO/DIS 6220

P/N: 100_03_HHU

The half urethane headforms, with conductive paint, are used to achieve the penetration testing procedure as per CSA-Z94.1 and other standards. They have been designed and manufactured to meet the ISO/DIS 6220 standards. The headforms have been designed to fall on a penetrator anvil.

FEATURES:

- Headforms comes with their technical datasheet
- Material: urethane covered with conductive paint
- Hardness: 60 +/- 5 Shore D
- Sizes available: A - E - J - M - O

Sizes available: A - E - J - M - O
